Mono-Material and Recyclable Packaging

For more information about our Mono-Material and Recyclable Packaging or about ICS please visit our website www.ics-world.com or contact us at info@ics-world.com
Contents

With today’s increasingly eco-conscious consumers, sustainable packaging is no longer a luxury but a necessity. Recently Mono-material plastic and Recyclable plastic materials have gained momentum due to their convenient, fool-proof recycling process.

- **Mono-material plastic**: packaging containing only one type of material (see pages 2-6).
- **Recyclable plastic**: packaging containing PP, PE and PET materials (see pages 7-10).

Mono-material and Recyclable plastic packaging can both be easily classified for recycling meaning they can easily be reused and repurposed giving the product a longer life cycle.

At ICS we offer a wide selection of Mono-material and Recyclable packaging. For more information contact your ICS Business Development Manager.
